Mobile Apps Development

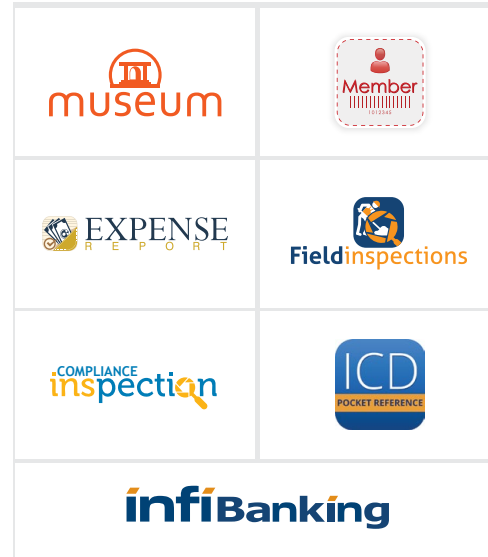

InfiCare Technologies delivers cost efficient customized mobile applications for business and consumer applications. Our Solution Architects will craft a solution that will be crisp and will be delivered in timely manner. We develop mobile apps for:

- iPhones and iPad
- Android phones and tablets

Leveraging our industry knowledge and technological background, we design and build mobile applications that are customer-friendly and facilitate easy and quick processing. Working closely with you we help identify features and functionalities that could be added to enrich user experience as well as those that could be deployed in later phases to keep costs within budget and timelines within target.

Staff Augmentation

InfiCare provides qualified IT professionals when you need and within your budget. Our clients rely on us for a wide range of technologies and skill levels including ERP such as SAP, Oracle & PeopleSoft; Mobile such as iOS & Android; Microsoft .Net; CMS solutions; Java and other technologies as well as help desk and infrastructure professionals.

Our team provides quick turnaround on your requirements and submits pre-screened resumes that really fit the required skills and domain expertise. We work with full spectrum of client staffing models from VMS based to those that are primarily hiring manager driven.

Direct Hire Staffing

InfiCare's Direct-hire team is well connected with professionals we have reached over the years. Our recruiters have an enormous internal database and a vast network of professionals to help provide you qualified professionals in project management, product engineering, sales, pre-sales, account management, business heads, VP and other roles.
